SUMMARY

Results-driven Associate Software Engineer with 1 year of experience in software development and programming. Proficient in multiple programming languages and frameworks, with a strong foundation in problem-solving and algorithm development. Seeking a position as an Associate Software Engineer at Accenture to contribute to cutting-edge projects and collaborate with a talented team of professionals.

EXPERIENCE

Associate Software Engineer

Accenture

November 2022 – March 2024, Bengaluru

- Working as a full stack developer in MOFT team of ROSS client of Accenture.
- Knowledge of application development involving multi-tier frameworks.
- Championed continuous improvement efforts, designing, coding, testing, and deploying enhancements that significantly boosted application stability.
- Developed new UI/backend features and optimized key functionalities (e.g., grid loading), leading to a noticeable improvement in user responsiveness.
- Collaborated with QA utilizing ServiceNow to resolve numerous bugs and customer enhancement requests, positively impacting customer satisfaction.
- Experienced working within a scrum team that implements the agile methodology along with the software development life cycle (SDLC).

PROJECTS

HotelBooking WebAPP

<https://github.com/iamRishabh07/HotelBookingApp> • January 2024 – February 2024

- HotelBookingApp is a comprehensive web application designed to streamline task management and hotel booking processes for users. The application offers a user-friendly interface for managing to-do lists, searching for hotels, and processing bookings, enhancing the overall user experience with efficient data fetching and seamless payment transactions.
- **Key Features:**
- **To-Do List Management:** Task creation/editing, completion tracking, filtering, and data persistence.
- **Hotel Booking:** Location-based hotel search, filtering by criteria, real-time availability, and booking functionality.
- **Payment Integration:** Secure transaction processing via Stripe integration.
- **Tech Stack:**
- **Frontend:** React, React Query, React Hook Form, TailwindCSS, Playwright (testing)
- **Backend:** (Specify technologies used, e.g., Node.js, Express, MongoDB)
- **Payments:** Stripe

Airline Ticket Booking System

<https://github.com/iamRishabh07/DevRev-AirLine> • May 2023 – July 2023

- Built an airline backend model using microservice architecture in Nodejs, Expressjs, MySQL(SequelizeORM).
- Implemented Flight Search and Booking, Authentication, Email Reminder microservices and ensured interservice communication using Axios.
- Implemented User Authentication using JWT authentication and OAuth ensuring security measures.
- Implemented Email Reminder service using CRON jobs, Node Mailer which fetches the pending email request.
- Used RabbitMq in Email Reminder service to establish publisher-subscriber model and async communication.
- Implemented Api Gateway which ensures Request validation and rate limiting.

EDUCATION

Bachelor of Technology

Kalinga Institute of Industrial Technology • Bhubaneswar • 2022 • 8.4

SKILLS

Technical Skills: Reactjs, Javascript, Restful Api, Css, Node, Node Js, Mongodb, Rabbitmq, Docker, Cidc, Docker Kubernetes, Firebase, Websocket, GraphQL, Grpc
